University of Mumbai Examination 2020 under cluster ____ (Lead College Short name)

Program: Information Technology Curriculum Scheme: Rev2016 Examination: Second Year Semester III wurse Code: ______and Course Name: Data Structure and Au

Course Code: _____ and Course Name: Data Structure and Analysis

Time: 1 hour

Max. Marks: 50

For the students:- All the Questions are compulsory and carry equal marks .

| Q1. | Merge sort uses which of the following technique to implement sorting? |
|-----------|--|
| Option A: | backtracking |
| Option B: | greedy algorithm |
| Option C: | divide and conquer |
| Option D: | dynamic programming |
| | |
| Q2. | What is the worst case time complexity of LSD radix sort? |
| Option A: | O(nlogn) |
| Option B: | O(wn) |
| Option C: | O(n) |
| Option D: | O(n + w) |
| | |
| Q3. | What is the output of the following code? |
| | void my_recursive_function(int n) |
| | { |
| | if(n == 0) |
| | return; |
| | printf("%d ",n); |
| | my_recursive_function(n-1); |
| | } |
| | int main() |
| | { |
| | my_recursive_function(10); |
| | return 0; |
| | } |
| | |
| Option A: | 10 |
| Option B: | 1 |
| Option D: | 109810 |
| Option D: | 10 9 81 |
| option D. | |
| Q4. | What is compaction? |
| Option A: | a technique for overcoming internal fragmentation |
| Option B: | a paging technique |
| Option C: | a technique for overcoming external fragmentation |
| Option D: | a technique for overcoming fatal error |
| - | |
| Q5. | Which of the following is not a technique to avoid a collision? |
| · | |

University of Mumbai

| Examination 2020 under cluster (Lead College Short name) | |
|--|---|
| Option A: | Make the hash function appear random |
| Option B: | Use the chaining method |
| Option C: | Use uniform hashing |
| Option D: | Increasing hash table size |
| | |
| Q6. | In Huffman coding, data in a tree always occur? |
| Option A: | roots |
| Option B: | Leaves |
| Option C: | Left sub trees |
| Option D: | Right sub trees |
| | |
| Q7. | What is the worst case time complexity of a quick sort algorithm? |
| Option A: | O(N) |
| Option B: | O(N log N) |
| Option C: | O(N2) |
| Option D: | O(log N) |
| | |
| Q8. | In the following scenarios, when will you use selection sort? |
| Option A: | The input is already sorted |
| Option B: | A large file has to be sorted |
| Option C: | Large values need to be sorted with small keys |
| Option D: | Small values need to be sorted with large keys |
| | |
| Q9. | Consider the usual algorithm for determining whether a sequence of |
| | parentheses is balanced. The maximum number of parentheses that appear on |
| | the stack AT ANY ONE TIME when the algorithm analyzes: (()(())(())) are: |
| Option A: | 1 |
| Option B: | 2 |
| Option C: | 3 |
| Option D: | 4 or more |
| | |
| Q10. | What is the value of the postfix expression 6 3 2 4 + – *? |
| Option A: | 1 |
| Option B: | 40 |
| Option C: | 74 |
| Option D: | -18 |
| 011 | |
| Q11. | Consider an implementation of unsorted singly linked list. Suppose it has its |
| | representation with a head pointer only. |
| | Given the representation, which of the following operation can be implemented in $O(4)$ time? |
| | in O (1) time? |
| | i) Insertion at the front of the linked list |
| | ii) Insertion at the end of the linked list |
| | iii) Deletion of the front node of the linked list |
| | iv) Deletion of the last node of the linked list |

University of Mumbai

| at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option C: DCAB Option D: ABDC | Examination 2020 under cluster (Lead Conege Short name) | | |
|--|---|---|--|
| Option C: I, II and III Option D: I, II and IV Q12. The data structure required for Breadth First Traversal on a graph is? Option A: Stack Option B: Array Option D: Queue Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABCD Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Pequeue Option D: Pequeue Option D: Pequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. Q15. For the tree below, write the pre-order traversal. | Option A: | I and II | |
| Option D: I, II and IV Q12. The data structure required for Breadth First Traversal on a graph is? Option A: Stack Option B: Array Option D: Queue Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option D: DCBA Option D: ABCD Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option D: Adata structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option B: Circular Queue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. Q15. For the tree below, write the pre-order traversal. | Option B: | I and III | |
| Q12. The data structure required for Breadth First Traversal on a graph is? Option A: Stack Option B: Array Option D: Queue Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option D: DCBA Option D: Adata structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option A: Queue Option B: Circular Queue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. Q15. For the tree below, write the pre-order traversal. | Option C: | I, II and III | |
| Option A: Stack Option B: Array Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option D: DCBA Option D: ABCD Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option B: Circular Queue Option D: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Option D: | I, II and IV | |
| Option A: Stack Option B: Array Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option C: DCAB Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. (2) (1) 9 | | | |
| Option B: Array Option C: Queue Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABCD Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Pequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Q12. | The data structure required for Breadth First Traversal on a graph is? | |
| Option C: Queue Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option B: Circular Queue Option D: Pequeue Option D: Priority Queue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Option A: | Stack | |
| Option D: Tree Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Option B: | Array | |
| Q13. If the elements "A", "B", "C" and "D" are placed in a queue and are deleted at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Option C: | Queue | |
| at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Pequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. Image: Q15. Image: Q15 for the tree below, write the pre-order traversal. | Option D: | Tree | |
| at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Pequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. Image: Q15. Image: Q15 for the tree below, write the pre-order traversal. | | | |
| at a time, in what order will they be removed? Option A: ABCD Option B: DCBA Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option B: Circular Queue Option D: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Q13. | If the elements "A", "B", "C" and "D" are placed in a queue and are deleted one | |
| Option B: DCBA Option C: DCAB Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option C: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | | | |
| Option C: DCAB Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | Option A: | ABCD | |
| Option D: ABDC Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option C: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | | DCBA | |
| Q14. A data structure in which elements can be inserted or deleted at/from both ends but not in the middle is? Option A: Queue Option B: Circular Queue Option C: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. | - | DCAB | |
| ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. 2 11 9 | Option D: | ABDC | |
| ends but not in the middle is? Option A: Queue Option B: Circular Queue Option D: Dequeue Option D: Priority Queue Q15. For the tree below, write the pre-order traversal. 2 11 9 | | | |
