Learning and Outcome

- To understand basic principles of quantum computing and study basic quantum computing algorithms.
- To analyze fundamental differences between conventional computing and quantum computing.
- To analyze and evaluate the classes of problems that can be elucidated and solved well by quantum computers.
- To develop the solutions for machine learning tasks using quantum computing better than the classical machine learning approaches.
- To analyze, research and develop real world applications using quantum computing approach.
- To understand quantum computing, its working, essential adaptation and changes reflected in the business process.
- To model & practice economy of velocity in enterprises, using essential quantum computing technology, its applications, and recent developments.
- To inculcate awareness about the upcoming quantum technology prospects and tools to drive quantum solutions

Objectives

1. To learn about concepts of Quantum Computing
2. To learn about evolution of computational architecture
3. To learn Networking & other enabling Technologies in creating Enterprise wide digital solutions
4. To learn about role of quantum computing in various application domains
5. To learn about quantum business models and its growth and importance in the Application industry
6. To learn about quantum algorithms and their applications
7. To learn and implement quantum programming with IBM quantum circuit composer
8. To learn Application Development using IBM Qiskit
9. To learn about AI driven predictive analysis and Quantum computing enabled enterprise software
10. To learn about Re-engineering business processes leveraging high velocity quantum computing procedures for dramatic outcomes
11. To learn about quantum security and cryptography
12. To learn about Machine learning using quantum computing

Introduction

Quantum computer exploits the quantum mechanical nature of matter to simultaneously exist in multiple possible states to compute in ways that are faster or more efficient than or even impossible on conventional computers. Quantum computing combines quantum mechanics, information theory, and aspects of computer science. The field is relatively new one that promises secure data transfer, dramatic increase in the computing speed, and may take component miniaturization to its fundamental limit. The number of applications of quantum computing is increasing, and the research field is expanding. The applications of quantum computing ranges from agriculture, healthcare, space to various industrial based applications. In this direction, TSEC intends to organize ATAL sponsored program for faculty development sponsored by AICTE on "Internet of Things" from 27th April to 1st May 2020.

Dr. G. T. Thampi
PRINCIPAL

**ATAL FDP on
“Emerging Quantum Computing Paradigm: Radical Change the way we conduct business process”, 22 – 26 February 2021**

This FDP focuses on basic preliminaries for understanding quantum computing, its working, essential adaptation and changes reflected in the business process, modeling & practicing economy of velocity in enterprises, essential quantum algorithms, its applications, and recent developments.

Day 1 (22.02.2021):

Session I (Inauguration Ceremony)

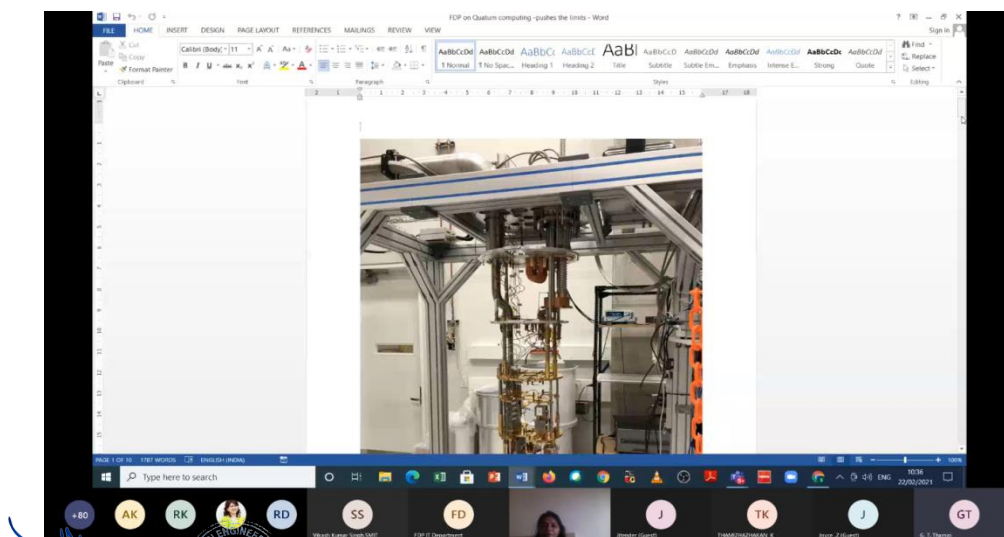

The course is intended to make the participants aware and able to work on this emerging area. Around 120 participants attended this course to gain knowledge in the area of designing projects and applications by the use of Quantum Computing.

The program commenced on 22nd February 2021 on Microsoft Team app with an introductory and motivational speech from following dignitaries:

1. Dr. G. T. Thampi (Principal, Thadomal Shahani Engineering College)
2. Dr. Madhuri Rao (HOD, department of Information Technology, Thadomal Shahani Engineering College)

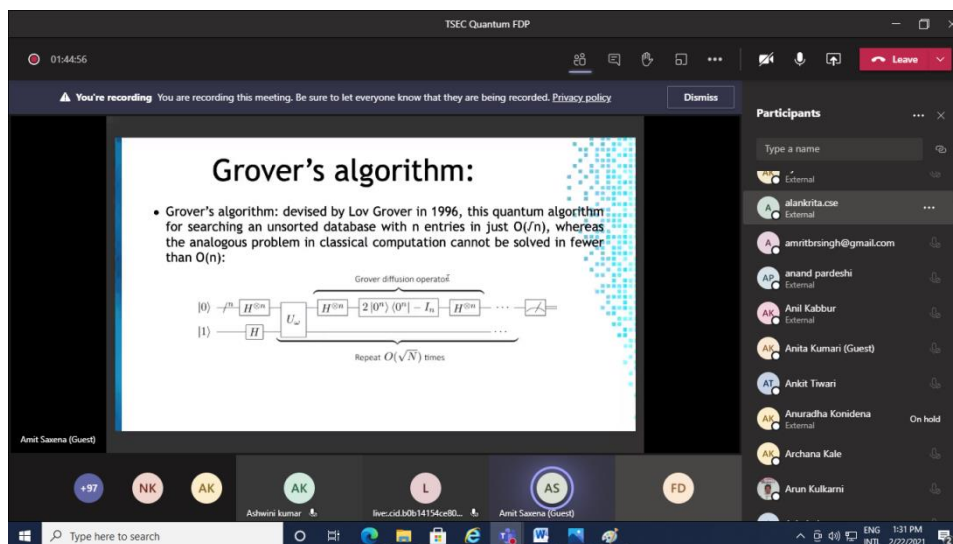

At the beginning of the inaugural session of FDP, Prof. Sanober Shaikh, Co-ordinator of the course, welcomed the Principal, Head of IT department along with all the participants and briefly introduced the course to the participants. Dr. G.T. Thampi, Principal TSEC, Keynote speaker and Convener of the FDP, firstly welcomed all the participants. He highlighted the need for such technologies and courses organized to learn such technologies. He explained that the main aim of the Faculty Development Programme is to emphasize on the hands-on sessions and mapping application aspects with respect to the theoretical concepts of quantum computing.

The subject of the Faculty Development Programme was pertinent and relevant to the current global scenario. He congratulated the participants for attending the Faculty development programme and encouraged the participants to utilize the opportunity to its maximum.

Session II and III

Mr. Amit Saxena, Joint Director, CDAC, Pune, Maharashtra delivered a talk on “Discussion on concepts of Quantum Computing”. He explained the basic concepts of quantum computing very nicely. The third session was taken by Mr. Vivek Gavane, Joint Director, CDAC, Pune, Maharashtra. During that session he introduced the audience to Evolution of Computational Architecture. He explained how computer evolved from basic computer i.e. ENIAC, Vacuum Tubes, Transistors, Circuit board, Silicon Chip till today's computer. He has explained about Moore's law and tried his level best to explain maximum concepts related to computation and impressed the participants a lot.

Day 2 (23.02.2021) Session I and II:

In the morning session lecture was delivered by Dr. Bhushan Jadhav Assistant Professor, Thadomal Shahani Engineering College, Mumbai. In this lecture, he gave a brief overview of networking and other enabling technologies. With the help of cisco packet tracer he has explained the centralized and distributed computing very well. Then he discussed the concepts of Cluster computing, Grid computing, Cloud computing and Quantum computing. After this he has explained the steps for ns3 installation and explained the NetSquid (The Network Simulator for Quantum Information) tool.

In Second session Dr. San Murugesan, Life Senior member at IEEE, Sydney, New South Wales, Australia, delivered a talk on role of Quantum computing in various application domains. He tried to cover maximum application domain where the use of quantum computing can radically change

the business process for e.g. Agriculture, Healthcare, Space, Chemical Industries etc. He has also explained what will be the benefits if we merge quantum computing and machine learning and quantum computing and Artificial Intelligence.

Session III:

In the Third session, Dr. Bhushan Jadhav has given the practical demonstration of Netsquid tool (A tool for quantum network design). He has explained the open source framework “Cirq” provided by the google.

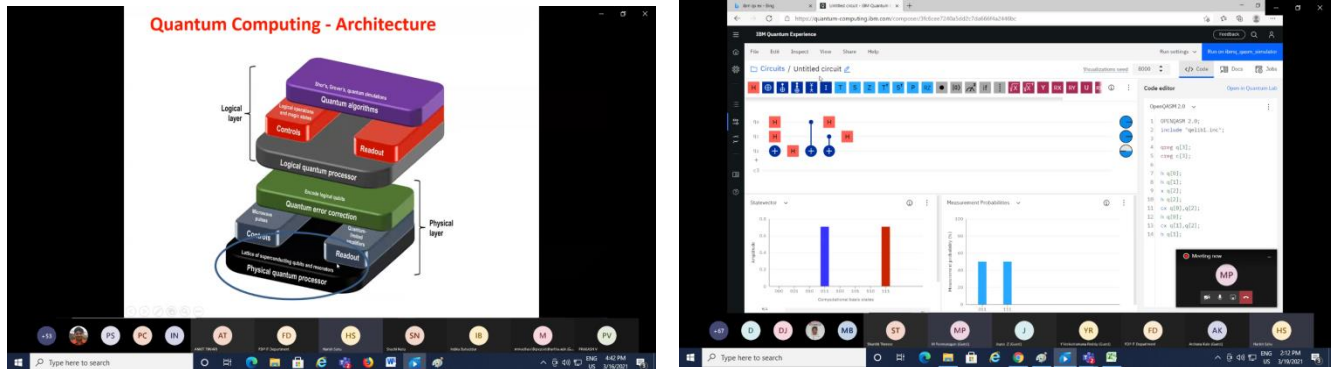

Day 3 (24.02.2021) Session I, II and III:

On third day all three sessions were taken by Dr. Harish Sahu, Scientist, DRDO, New Delhi. In the First Session he has delivered the basic concepts that are required for quantum algorithm. He has explained different types of quantum gates in detail.

ATAL FDP on
“Emerging Quantum Computing Paradigm: Radical Change the way we conduct business process”, 22 – 26 February 2021

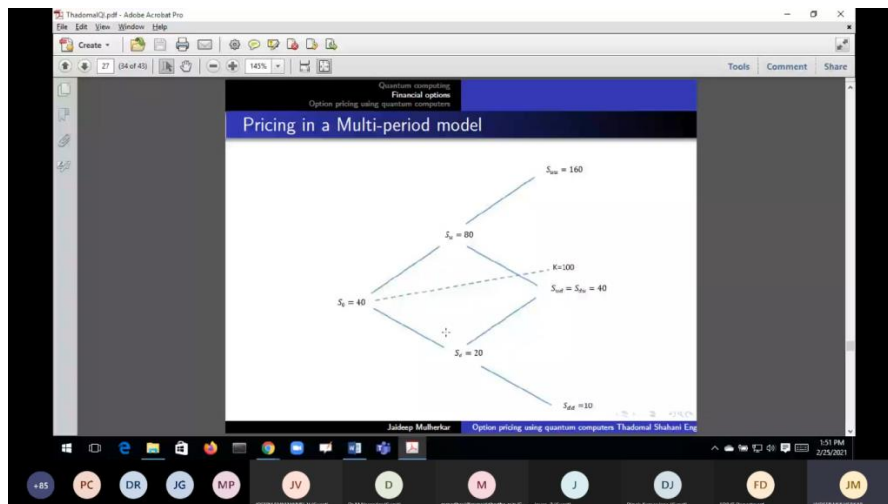

In second and third sessions he has explained quantum algorithm and practical demonstration of these algorithms on IBM Quantum Software called as Qiskit. All the sessions conducted by Dr. Harish Sahu were interactive and all the participants liked his way of explanation.

Day 4 (25.02.2021)
Session I and II:

This session was conducted by Dr. Harish Sahu. In this session he covered the concept of Quantum Security and Cryptography.

In Second Session Dr. Jaideep Mulherkar, DA-IICT, Gandhinagar impressed the participants by covering the topic Reengineering business processes leveraging high velocity quantum computing procedures for dramatic outcomes. He took finance as business process and explained the concept very well.

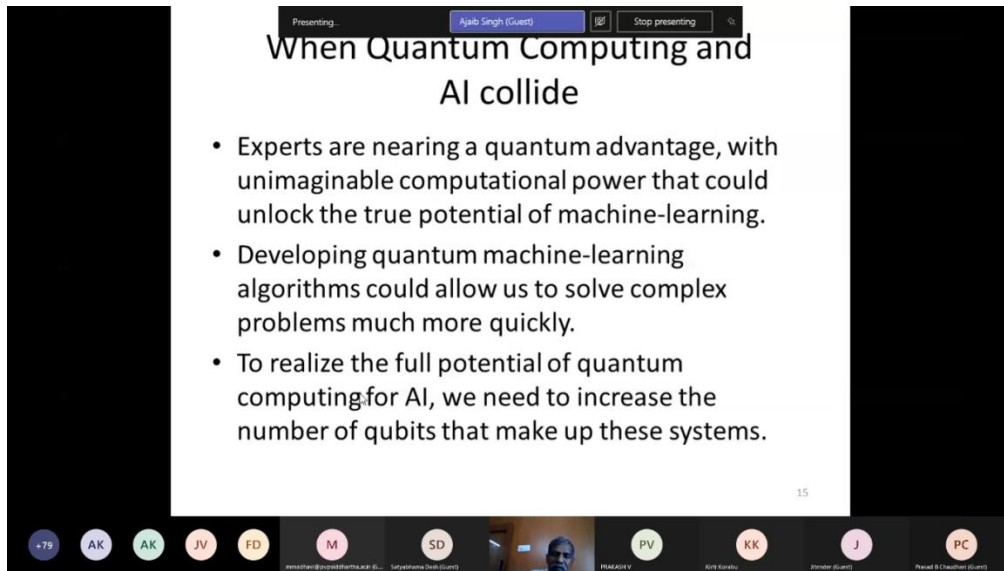

Session III:

In Session III Dr. A. Kannan, Senior Professor, VIT Vellore delivered a talk on AI driven analysis and quantum computing enabled enterprise software.

Day 5 (26.02.2021)
Session I and II:

First session was covered by Dr. A. Kannan. In this session he explained Machine learning using Quantum Computing. He has covered how algorithm of machine learning can be executed with quantum computing.

The second session was conducted by Ms. Mamta Pandya, Entrepreneur, Art of Living teacher. She took the session very nicely by covering the topic how we can focus our source of energy. She performed bhramari pranayama with the participants, explained benefits of meditation. All the participants enjoyed and felt very nice after performing all the activities.

Session III:

Last session was valedictory session. Some of the participants shared the feedback. Convener of the FDP Dr. G. T. Thampi thank AICTE for giving the opportunity to conduct this 5 days FDP on “ Emerging Quantum Computing Paradigm: Radical change the way we conduct business

process”. The Co-coordinator Mr. Chetan Agarwal has given vote of thanks and successfully concluded the end of program.

The workshop was a success as all the participants were very much satisfied which reflected from the excellent comments given by all of them. The response from the participants about the workshop was tremendously good and positive and as per the feedbacks they would want to attend such more hands-on workshops further in future.

Acknowledgements

We would like to express our deep sense of gratitude to the team of experts Dr. G.T. Thampi, Mr. Amit Saxena, Mr. Vivek Gavane, Dr. Bhushan Jadhav, Dr. San Murugesan, Dr. Harish Sahu, Dr. Jaideep Mulherkar, Dr. A. Kannan and Ms. Mamta Pandya for giving their valuable time and imparting knowledge to the participants in the field Quantum Computing.

We would like to thank all the faculty members, research scholars and students for participating in the course. We would also like to thank all the faculty members of the organizing committee, Teaching Staff and Non-technical Staff of Department of Information Technology, Thadomal Shahani Engineering College for their kind support throughout the course.

Last but not least we would like to thank ATAL for sponsoring and giving us opportunity to conduct one week online Faculty Development Program.

POORNARTHA PRASHANT SAWANT

has successfully completed the online, non-credit Specialization

Machine Learning

Congratulations! This Certificate establishes that you have demonstrated proficiency in the exciting, high-demand field of Machine Learning through rigorous online coursework from leading Machine Learning researchers at the University of Washington. Through a series of practical case studies, you gained applied experience in major areas of Machine Learning including Prediction, Classification, Clustering, and Information Retrieval. You learned to analyze large and complex datasets, create systems that adapt and improve over time, and build intelligent applications that can make predictions from data. Take pride in your accomplishment and welcome to the global Machine Learning community!

Emily Fox, Amazon
Professor of Machine
Learning, Statistics
Carlos Guestrin,

Akshita Gulati

has successfully completed the online, non-credit Specialization

Python for Everybody

This Specialization builds on the success of the Python for Everybody course and will introduce fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language. In the Capstone Project, you'll use the technologies learned throughout the Specialization to design and create your own applications for data retrieval, processing, and visualization.

POORNARTHA PRASHANT SAWANT

has successfully completed the online, non-credit Specialization

Applied Data Science with Python

The 5 courses in this University of Michigan specialization introduce learners to data science through the python programming language. This skills-based specialization is intended for learners who have a basic python or programming background, and want to apply statistical, machine learning, information visualization, and text analysis techniques to gain new insight into their data. In the final course, students will work on real-world data analysis projects, building a portfolio which showcases their work while at the same time helping real clients gain a better understanding of their data.

Registration message:

Dear Sir/Madam,

Warm Greetings from *Department of Computer Engineering, Thadomal Shahani Engineering College, Mumbai*.

We cordially invite you to join us for:
One week *Online Short Term Training Programme* on *"Programming in JAVA"*

Sessions by renowned academicians

Dr. G. T. Thampi
PRINCIPAL
Thadomal Shahani Engineering College
Bandra (W), Mumbai - 400 050.

Course content:

- Introduction to JAVA programming
- Packages
- Multithreading and applet
- AWT & JDBC connection
- Server programming using JSP & Servlet
- Online teaching tools

Date-

13th July 2020 to 18th July 2020

Timings-

2 PM to 5 PM

Day 3: STTP on Programming in JAVA (2020-07-15 at 01:32 GMT-7)

The screenshot displays a Google Meet interface. At the top, a slide titled "EXCEPTION HIERARCHY" is shown. The slide content is as follows:

```
graph TD; Throwable --> Exceptions; Throwable --> Error; Exceptions --> Checked["Checked Exceptions  
Example: IO or Compile Time Exception"]; Exceptions --> Unchecked["Unchecked Exceptions  
Example: Runtime or Null Pointer Exceptions"]; Error --> VMError["Virtual Machine Error"]; Error --> Assertion["Assertion Error etc"];
```

Below the slide, the Meet interface shows a grid of participants. The top right corner of the Meet window displays the name "Prof Mansi Choche" and a profile picture with the letter "P". The bottom of the screenshot shows the browser's address bar with the URL "meet.google.com/wec-uxcs-bia?pli=1&authuser=1" and a taskbar with various application icons.
